

**IIEEJ Transactions on  
Image Electronics and Visual Computing**

**Vol.5 No.1 June 2017**

**CONTENTS**

---

**Contributed Papers**

- |           |  |  |
|-----------|--|--|
| <b>1</b>  | Multi-Feature and Balanced Search Tree based Depth Range Definition in HEVC Inter Prediction for VLSI Implementation | Gaoxing CHEN, Zhenyu LIU, Tetsunori KOBAYASHI, Takeshi IKENAGA                 |
| <b>10</b> | A High Efficient Multi-Scale Multi-Target Object Detection Processor Using SGI Features                              | Masayuki MIYAMA  |
| <b>20</b> | Outlier Management for Robust Visual SLAM in Dynamic Environments with Easy Map and Camera Pose Initialization       | Jun SHIMAMURA, Kyoko SUDO, Masashi MORIMOTO, Tatsuya OSAWA, Yukinobu TANIGUCHI |
| <b>34</b> | Digital Halftoning by Stochastic Dither Screen Mask Representing Green to Blue Noise Characteristics                 | Naoto KAWAMURA   |
| <b>42</b> | 3D Single/Multiple Ground Planes Detection with Camera Angle Estimation  | Yankun LANG, Haiyuan WU, Toshiyuki AMANO, Qian CHEN                            |

**Announcements**

- 52** Call for Papers: Special Issue on Application-Based Image Processing Technologies

**Guide for Authors**

- 53** Guidance for Paper Submission
