

### 8. Footnotes

Use footnotes sparingly (or not at all!) and place them at the bottom of the column on the page on which they are referenced. Use Times 9-point type, single-spaced. To help your readers, avoid using footnotes altogether and include necessary peripheral observations in the text (within parentheses, if you prefer, as in this sentence).

### 9. Copyright Forms

You must include your fully completed, signed IEEEJ copyright release form when you submit the final version of your paper. We **must** have this form before your paper can be published in the proceedings.

### References

List and number all bibliographical references at the end of the paper. The references can be numbered in order of appearance in the document. When referring to them in the text, type the corresponding reference number in right side round brackets and with superior as shown at the end of this sentence<sup>1)</sup>.
